

## DEVASTATION OR PRESERVATION

Which do you choose?

Current sandbagging methods resemble the fire bucket brigades of the 1800's.

The SandMaster is the fire extinguisher for flood control for the 21st century!

A Business and Property Saved by the SandMaster

The SandMaster quickly creates and places multiple sandbags when and where they're needed.

It transforms the gruesome, time consuming, labor intensive and expensive task of sandbagging into a quick, viable, cost effective solution for all sandbagging needs.

THE ONLY SYSTEM THAT DOES ALL FOUR PHASES OF  
A SANDBAGGING OPERATION

FILL THE BAGS WITH MOST MATERIALS WET OR DRY  
TRANSPORT THE BAGS TO WHERE THEY ARE TO BE USED

SECURELY CLOSE THE BAGS

PLACE THE BAGS WHERE THEY ARE NEEDED

## SANDMASTER ADVANTAGES

- Capable of 4,800-6,200 sandbags in 8 hours with only 3 people
- Fills, transports, securely closes and places the bags
- Can utilize most materials wet or dry including materials available on-site
  - Reduces transportation costs by filling the bags where they are needed.
- Saves time and labor by creating more bags with fewer people
- Simple design means it will always work when needed
- Made in the USA and built to last
  - For skid steers, loaders and excavators

Hydraulic Technology  
replaces hand labor for  
the fast and efficient  
on-site filling and  
placement of sandbags
